Available in all these delicious choices:

Beef Turkey Chicken Duck Lamb Pork

Veal Buffalo Salmon Exotics

The "secret" of feeding real and fresh food is variety!

Our BioComplete™ selection of species specific foods was developed after exhaustive and extensive research involving our many clients' exorbitant veterinary bills. We were able to isolate a common link. Most of the problems that animals experience are caused by nutritional inadequacies. This led to undeniable truth:

#1: Cats and dogs are carnivores. They need to eat meat. (90% of their diet should consist of meat)

#2: Dry foods are 60%-80% cereals, grains and fillers which cats and dogs cannot digest properly.

Animals thrive on our BioComplete entrees. Special diets with nutritious ingredients including cranberries for urinary health, blueberries as antioxidants, carrots for their eyes and natural cleansing and detox food available.

In addition to our nutritious deli meals, we offer the following items:

Natural Rawhide Chews • Organic Bakery Treats

Full Line of Nutritional Supplements

• Wild Salmon Oil • Prozyme • Functional Treats (Call and ask what they do!)

• Vitamins • Herbal Remedies for skin, coat, hip and joints

All Natural Shampoos and Grooming Aids

Strollers • Carriers • Bedding • Designer Clothing • Jewelry
